Applies to Flush and Stile & Rail doors

FINDING DOOR NUMBERS ON ALL METALS ASTRAGALS & CHANNELS

All Metals Stamping, Inc. supplies astragals and edge sets for VT architectural wood doors. To determine which door an astragal is designed to fit, please look at the white label located on the inside of each machined astragal. The swing and door number are listed on the last line.

Unmachined astragals are not identified with door numbers. However, *door numbers are listed on the outside of packages* containing unmachined astragals and channels.

A white rectangular label with a black border, containing door identification information. An arrow points from the text above to the label.
