## VT Dimensions Improves Online Ordering System

(Holstein, IA – October 7, 2013): VT Industries announces the release of *VToonline* 2.0, an upgrade to the online order system for VT Dimensions Countertops. Highlights include several new system features, along with order entry improvements, and behind the scenes programming to improve speed, accuracy, and accessibility to order information.

The first exciting new feature is the customer's ability to track order status from order processing to production to shipment. Another beneficial addition is the ability to view a full year's invoices in full line item detail. These advancements allow customers to instantly access their order information and history with the on-demand convenience that *VToonline* provides.

VT Dimensions countertop ordering is now easier than ever with the addition of substrate options and the streamlined specialty countertop page. The new laminate availability screen allows users to view the current on-hand quantities of stock laminates. Additionally, all available colors, including many factory colors, are accessible from the drop down color field with no special actions required. Lastly, added pricing visibility allows customers to view their pricing for each item entered and estimate an order total before submission.

"Many hours of careful planning and hard work have gone into this update, and we could not be happier with the added value and service VT is able provide to our *VToonline* customers," explained Mary Gebers, VT Dimensions Customer Service Manager.

To register with *VToonline* 2.0, contact Customer Service at 1.888.287.8356. For more information on VT Dimensions visit [www.vtdimensions.com](http://www.vtdimensions.com).
