## **BLOCKING NOT REQUIRED FOR AGRIFIBER AND WOOD PARTICLEBOARD DOORS FOR SCREW ATTACHED SURFACE HARDWARE ITEMS**

Based on recent test results, doors constructed with agrifiber particleboard cores and wood particleboard cores do not require reinforcement blocking for surface mounted hardware attached with screws. Results were collected per WDMA T.M. 10: Screwholding Test Method for determining the screw holding capacity of wood door faces (unblocked), meeting WDMA **Heavy Duty** Performance Level requirements.
