RADIANT.

THE SUPA COLLECTION

Architectural Wood Doors
Performance meets seamless design integration in the Supa Collection, our outstanding line-up of commercial paint-grade MDF door offerings. Whether you’re envisioning a classic, colonial panel design, an Art Deco glass door, or anything in between, we can build it. Our specialists will provide you with a door for every application, from a beachfront property to a modern office. We’ll deliver the quantity you need for any project. With VT, you’ll get the performance you need—and the excellence in craftsmanship you demand. Our state-of-the-art manufacturing facility has the latest technologies in place, with processes that are second to none and quality assurance checkpoints to ensure a flawless product. All backed with a limited five-year warranty.
Consistency and beauty are the hallmarks of the Supa Collection. You’ll enhance your projects while meeting your every design and performance need—all from one trusted source, VT.

The Supa Collection is indeed substantial:

- Fire doors
- STC ratings
- Louver doors
- Flush doors
- Flat and raised panel doors
- Glass doors
- Mirrored doors
- Painted doors
- Custom options available

*Wood jambs and pre-hung units are available for most door types upon request.*

*ADA-compliant sizes are also available upon request.*
The Supa Collection offers a wide range of fire-rated doors to complement architectural spaces. You can effectively create a matching design across your commercial projects whether it be traditional, contemporary, or historic. Supa Collection fire doors feature traditional stile and rail construction perfectly matched to our non-rated doors. Importantly, our doors remain at the standard 1-¾” thickness even with 90-minute ratings.

The Supa Collection has the following fire-rated options:

- 20-, 45-, 60-, and 90-minute fire-rated doors available in any elevation
- Heights up to 8’ 0”, widths up to 4’ 0”
- Single or pairs; raised or flat panels designed to match non-rated doors at 1-3/4” or 2-1/4”
- Temperature rise fire doors (only available in 45-, 60-, and 90-minute without glass)
- Fire-rated doors are available with glass configurations
- Precision machining for standard, mortised, or electrified hardware available
- Smoke, non-rated, 20-minute Category A and Category B, 45-90-minute Category A only
- 45-90-minute frames for single openings only

Our construction method is ideally suited to layer a fire core between the two halves to make a fire-rated door look exactly like a non-rated door.
Noise is one of the single most common complaints at hotels, condos, and other commercial properties. For this reason, STC ratings have become a primary consideration when choosing doors for large-scale projects.

- Solid, double-refined MDF construction
- Contact your inside sales representative for more information regarding specific project requirements
LOUVER DOORS FOR EVERY DESIGN.

Louver doors are both functional and aesthetically pleasing. Whether a “true” vented louver or a “false” louver for appearance, the Supa Collection has a louver door for every design. We’ll customize your panel layout and your stile and rail widths, and we offer swinging louver doors, bypass louver doors, or pocket louver doors.

The Supa Collection has the following louver options:

• 6 standard elevations (custom elevations available)
• True and false louver options
DESIGN WITH GLASS.

Glass is a great complement to any door in the Supa Collection and is ideal for commercial applications such as hotel bathroom slider doors, egress doors, office doors, and hotel meeting rooms. We have distinct glass options and are confident you’ll find that perfect answer for projects wanting to add natural light, transparency, or a featured look to your commercial project.

- Available in five standard glass types: white lami, clear tempered, clear reeded, rainy, and frosted. Custom glass options available upon request.
- Contact factory for fire-rated glass options (default 3/16" fire glass)
- True Divided Lite (TDL, aka muntins), on applications where each opening contains its own piece of glass, creates an upscale custom look to the door (most popular TDL sticking profiles are True T and True Oval O)
- Standard face dimension of muntin bars is ½” wide plus the sticking width (True T and True Oval O muntins are ¼” plus the sticking width)

ARCHITECTURAL GLASS

Any paneled Supa Collection door design may be replaced with one or more pieces of clear, frosted, decorative, or specialty glass. The Supa Collection offers a robust selection of True Divided Lite (TDL) and simulated divided lite designs for a variety of applications. As always, since every door is built to order, you can freely customize any design.
REFLECT ON YOUR DOOR.

Applied mirrors are popular in Supa Collection doors. Our construction allows for a different design on each side of the door. The “split” design is perfect for hotels looking to have a full-length mirror within the guest room without having to place the mirror on the wall. Mirrors are fixed with adhesive unless otherwise specified and can be applied to one or both sides of the door. Any design can have mirrors applied to it. Mirrors come in 1/8” and 3/16” thickness. Mirrors may be field applied if desired.

• 1/8” or 3/16” thickness for beveled or nonbeveled
• Mirrors are fixed with adhesive unless otherwise specified—can be applied to one or both sides of the door
• Available with any elevation
EYE-CATCHING COLOR.

- Available in any paint color from all major paint manufacturers. Color match available upon request
- Water-based primer and paints are standard
- All painted doors have factory-sealed top and bottom rails
- All painted doors are hand sprayed with two coats of water-based paint
- Meet AWS System 8 standards

GO BEYOND CUSTOMARY.

The custom nature of the Supa Collection allows you to create beautiful doors designed specifically to fit your project’s needs. VT door specialists are happy to assist you in designing exactly what you need. From custom elevations, sizes, panels, and profiles, to even a custom color, VT’s Supa Collection offers exactly what you need to bring your project to the next level.

Longer lead times may apply.
STANDARD ELEVATIONS.

- All stile and rail dimensions are adjustable
- Create custom looks by interchanging panels and glass

WOOD JAMBS AND PRE-HUNG OPTIONS.

The Supa Collection supplies machined knock down jambs or pre-hung doors upon request. Pre-hung is only available in non-rated or 20-minute singles.

JAMB OPTIONS:

- Finger Joint Pine: 11/16" standard x any width
- Poplar: 3/4" standard x any width
  * Custom thickness available for all jambs
- Wood Fire-rated Jambs: 20-, 45-, 60-, and 90-minute rated
  * 45-90-minute single opening only

Supa Collection jambs are screwed together, not just stapled, providing a stronger, more durable pre-hung unit.

HINGE OPTIONS:

Hinges available in the following colors:

- US 3 - Polished Brass
- US 10B - Oil Rubbed Bronze
- US 26 - Polished Chrome
- US 26D - Brushed Chrome
- US 15 - Satin Nickel
- Other sizes and colors available upon request
- Square or Radius Corners: 3-1/2" x 3-1/2"; 4" x 4"; 4-1/2" x 4-1/2"

Door sills available in Bronze or Mill (aluminum)
Building green is second nature for architects, designers, and building owners. The Supa Collection is an ideal choice for all projects whether pursuing LEED® status or not.

- The Supa Collection doors are backed by a limited five-year warranty, making them the ultimate sustainable door
- Non-FSC certified doors are made with recycled fiber content
- VT doors can assist in achieving multiple green building program credits, including LEED
- All doors are CARB compliant
- The Supa Collection’s MDF doors are FSC certified upon request
- NAUF, NAF, or ULEF components are available upon request
- LEED-accredited professionals on staff
- Doors are made with a minimum of 86% recycled wood fiber and low VOC primer, paint, and glue
