AWI QUALITY CERTIFICATION PROGRAM (QCP)

The Architectural Woodwork Institute (AWI) Quality Certification Program (QCP) is a quality assurance system that ensures the architectural woodwork within a project is fabricated, finished and/or installed in accordance with Architectural Woodwork Standard (AWS).

VT became a QCP member through comprehensive testing, facility inspection and the ability to demonstrate that VT can fabricate and finish architectural wood doors to AWS.

Certification becomes mandatory when included by direct reference in the project specifications. In this case, VT will submit for quality certification labels and/or certificates of compliance. The size of the project and possible AWI compliance inspections (if requested) will require a fee. Contact your CSC representative for more information.

For a project to be considered for AWI QCP Certification, the project must be registered with AWI QCP before VT can process your order.
