

EPT DEVICE APPROVAL ON 20-MINUTE THROUGH 90-MINUTE
FIRE DOORS

VT now has approval through Intertek/Warnock Hersey for EPT devices in 20-minute through 90-minute fire doors.

The door backbox, supplied with the EPT device, is required for use on fire rated wood doors. The EPT prep in the door must be lined on all three sides with intumescent. VT will furnish the intumescent and application instructions. The intumescent needs to be applied by the hardware installer.

The maximum size for an EPT prep is 1-1/4" width x 7-3/4" length x 1-5/8" depth on 45-, 60- and 90-minute rated doors.
