

TYPE I & TYPE II ADHESIVES

Type I & Type II adhesives are approved by Architectural Wood Door Industry Standards (WDMA & AWI). The adhesives are tested in accordance with WDMA TM-6 Adhesive Durability Test.

Type I Adhesive:

- Intended for both interior and exterior applications
- This adhesive is designed to be more water resistant
- Testing includes boiling water submersion, oven drying, and cold-water submersion cycles

Type II Adhesive:

- Intended for interior applications only
- This adhesive is less water resistant
- Testing includes cold water submersion and oven drying cycles

VT constructs architectural wood doors with Type I adhesive.
