When it comes to your design project, every detail matters. That's why VT crafts every door with meticulous attention to beauty and expression. Combined with our wide array of finish options, we're able to create architectural wood doors that elevate the aesthetics and performance of your project. All doors are made to your exact specifications to meet your performance and design standards.

When you are designing for beauty, VT is a compelling choice. VT offers a unique combination of style, quality, and performance.

And with every door we sell, you can always count on customer service that's second-to-none.

VT Wood Veneer Doors

STYLE MEETS DURABILITY

Extraordinary craftsmanship. Natural beauty. Durable performance. VT's Heritage and Eggers Stile & Rail Collections offer a perfect balance of style and performance.

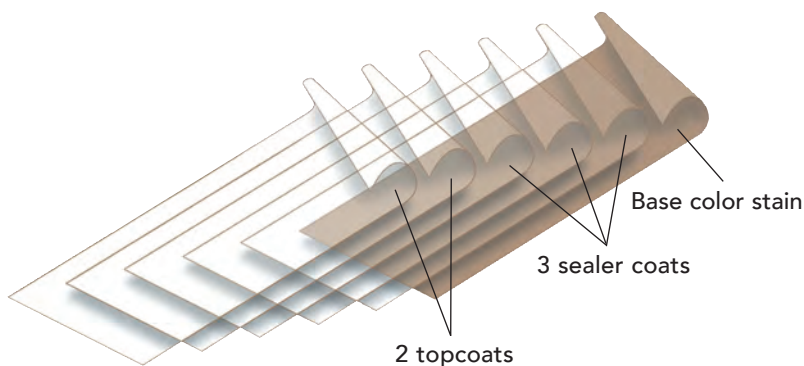

Featuring a complete catalog of factory finishes to choose from, we're confident you'll find a door to perfectly complement any design.

- UV cured factory finish to meet WDMA TR-8 and AWS System 9 is standard
- For high-profile projects, custom color matching available
- A wide variety of VT color choices
- Three sealer coats and two topcoats shield and protect flush doors
- Advanced computer automation flawlessly applies each coat, and a computer-controlled automatic system provides durable, even coats

HOW TO SPECIFY

WDMA TR-8/AWS System 9 UV cured acrylated polyurethane. The polyurethane shall be UV cured to produce a finish per WDMA I.S. 1-A/AWS Section 5. Top and bottom rails shall be factory sealed with an approved wood sealer. Specify the finish.

PROTECTIVE COATING PROCESS

NATURAL VS. SELECT WHITE

Certain wood veneers—most notably maple, birch, and ash—contain both heartwood and sapwood when natural is specified. These heartwood/sapwood combinations can create marked color contrasts across the finished face veneer, possibly causing an undesirable effect. By specifying “select white” veneer, only sapwood will be used so color variations will be minimized, thus creating a more uniform appearance across the door face.

Select White face veneer

CONSISTENT AND BEAUTIFUL FINISHES

Streamline the color matching process for your project by selecting from VT’s popular color choices (see color swatches in this brochure). To ensure satisfaction, order a free sample to review before making your final decisions. You’ll save time and money, and the result will be a consistent, beautiful finish.

ELEVATE THE AESTHETICS & PERFORMANCE OF YOUR PROJECT

VT finishes not only complement the distinctive beauty of the doors but also enhance their outstanding durability. Our factory finishes are UV cured and formulated to provide a tough shell of protection.

FINISH *Options*

CUSTOM OPTIONS

VT offers a wide variety of factory color choices, available on a quick turnaround, to meet your design considerations. Samples may be requested through your VT inside sales representative. Custom color matching is also available for high-profile projects. Simply send us a 3" x 5" physical sample of the finish color you desire, and we'll match it to meet your project needs.

EXOTIC OPTIONS

If your design calls for specialty wood veneer, VT can make it happen. We have the capability to manufacture high-quality doors to your exact design needs and specifications. Using high-end or exotic veneers, we'll provide the perfect specialty veneer door for your project. Please contact your inside sales representative for availability of specific exotic veneers.

NEW FINISHES

Color trends are always changing in the design world. VT stays on the cutting edge of trends, adding three new color finishes, Mocha, Timber, and Umber. These new colors are available in all of our standard veneers.
