

MACHINING OF VT FIRE RATED DOORS BY OTHERS

In order for another company to machine VT fire rated doors, the company must write a letter to VT requesting to become a licensed machiner of fire rated doors manufactured by VT and authorized by Intertek/Warnock Hersey. VT will then forward this request to Intertek/Warnock Hersey advising them to send the requesting company VT machining specifications and set up said company as a licensed machiner of VT fire rated doors.

Please refer to the sample request letter, "Request To Become VT Licensed Machiner Through Intertek/Warnock Hersey".
