#P129F

Revision 03

Applies to Flush doors

THE VT "EDGE" ON HPDL DOORS WITH - 1, -2 & -4 STILE FINISHES

The same solid hardwood edge found in our 5-ply wood veneer flush doors is now being incorporated into our high pressure decorative laminate doors with wood outer stiles to be finished by others (-1), or factory stained (-2) or painted (-4).

This type of construction conceals the crossbands, eliminating finish problems associated with the exposed crossband end-cut.
