#P152F

Revision 03

Applies to Flush doors

## DOOR WEIGHTS

The following chart shows the weight in pounds per square foot for doors with a finished thickness of 1-3/4". The weights are approximates and apply to both high pressure decorative laminate and wood veneer doors. Cutouts, hardware, reinforcement blocking and wide stiles & rails will cause weights to vary.

Door	Pounds per Square Foot
Agrifiber and Wood Particleboard Cores	5.5
Structural Composite Lumber Core	6
Stave Lumber Core	4.5
Fire Core	8.5
STC 35-41	7
STC 42-49 <sup>+</sup>	9
Lead Lined with 1/16" lead	9

<sup>+</sup> STC49 door required to be 2-1/4" thick.
