Revision 01

BLOCKING NOT REQUIRED FOR AGRIFIBER AND WOOD PARTICLEBOARD DOORS FOR SCREW ATTACHED SURFACE HARDWARE ITEMS

Based on door face screw withdrawal tests (unblocked) on VTI agrifiber particleboard cores doors and wood particleboard core doors, the use of screws are allowed for attachment of surface mounted hardware items.

Screw withdrawal tests were in accordance with WDMA TM 10 Test Method for Screw Holding Capacity, the doors achieved a WDMA **Heavy Duty** Performance Level. The use of through bolts is not required.

The above door types manufactured with reinforcement blocking will achieve WDMA **Extra Heavy Duty** Performance Level for screw attachment of surface mounted hardware items.

Blocked or not blocked, these doors carry a Lifetime Warranty against manufacturing defects.
