PUTTYING NAIL HOLES

In Applied Moulding:

VT Industries standard application of moulding is with adhesive only. Where nails are required per the door construction or moulding dimensions, nail holes will be treated as follows:

Doors Finished* at VT– Nail holes will be filled to match the finish

Doors Primed at VT – Nail holes will be puttied but not primed

Doors shipped without finish – Nail holes will not be filled

In Beads (for Louver or Lites installed at VT)

Beads are secured in the opening with nails (brads). Nail holes will be treated as follows:

Doors Finished* at VT– Nail holes will be filled to match the finish

Doors Primed at VT – Nail holes will be puttied but not primed

Doors shipped without finish – Nail holes will not be filled

* This includes clear, stained and painted finish options
