SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier
Trade name: LG HI-MACS® Sheets (Acrylic Solid Surface Material)

1.2. Relevant identified uses of the substance or mixture and uses advised against
Identified use: Surface Material

1.3. Details of the supplier of the safety data sheet
LG Hausys America, Inc.
900 Circle 75 Parkway
Suite 1500 Atlanta, GA 30339
Tel: 678-486-8250

1.4. Emergency telephone number
Emergency number:
706-879-3200 (Product/Safety)
800-255-3924 (Chemtel- Transport Emergency)

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture
Classification:
Comb. Dust H232
Skin Sens. 1 H317
Full text of H-statements: see section 16

2.2. Label elements
Labelling
This product meets the criteria of article definition and therefore is exempt from labeling.

2.3. Other hazards
Hazards not otherwise identified:
"LG Hi-Macs" Solid Surface Material is not hazardous and does not pose physical hazards and/or health risk as supplied or shipped. However, operations such as sawing, routing, drilling and sanding can generate dust. High concentrations of dust can cause reversible physical irritation to eyes, nose and respiratory passages and cause coughing and sneezing. Even though there are no exposure limits established for dust from Hi-Macs®, avoid breathing dust.
"LG Hi-Macs" Solid Surface Material does not release any gas or vapors at ambient conditions. At higher temperatures (>3000°C / 5720°F), small amounts of methyl methacrylate (MMA) could be released, amount dependent upon temperature, time and other variables. Vapors at high concentration can cause skin and respiratory irritation. Overexposure to vapors can cause headache, nausea, weakness and lung irritation with cough, discomfort and shortness of breath. Individuals with pre-existing diseases of the lungs or skin may have increased susceptibility to the effects of overexposure to methyl methacrylate.

2.4. Unknown acute toxicity (GHS-US)
Not applicable

SECTION 3: Composition/information on ingredients

3.1. Substance
Not applicable

† This product meets the criteria of article definition and does not pose any physical hazards and health risk as supplied.
Name | Product identifier | %
--- | --- | ---
Aluminium hydroxide (component) | (CAS No) 21645-51-2 | 52 - 62
Methyl methacrylate polymer (component) | (CAS No) 9011-14-7 | 30 - 50
Methyl methacrylate (component) | (CAS No) 80-62-6 | <= 1
Copolymer colorants (component) | (CAS No) Not available | 1 - 5

3.2. Mixture
Not applicable

SECTION 4: First aid measures

4.1. Description of first aid measures
First-aid measures after inhalation: Inhalation is unlikely a route of exposure at ambient temperature. In case of inhalation of dust or vapor from processing: Allow breathing of fresh air. Allow the victim to rest. Consult a physician if breathing is difficult or if symptoms persist.

First-aid measures after skin contact: Unlikely a route of exposure as supplied. In case of generation of dust or vapor from processing: Wash all exposed skin area with mild soap and water, followed by warm water rinse. If skin irritation or rash occurs: Get medical advice/attention. Wash contaminated clothing before reuse.

First-aid measures after eye contact: Unlikely a route of exposure as supplied. Rinse immediately with plenty of water. Obtain medical attention if pain, blinking or redness persists.

4.2. Most important symptoms and effects, both acute and delayed
Symptoms/injuries after inhalation: May cause an allergic skin reaction.

4.3. Indication of any immediate medical attention and special treatment needed
No additional information available

SECTION 5: Firefighting measures

5.1. Extinguishing media

Unsuitable extinguishing media: None known

5.2. Special hazards arising from the substance or mixture
Fire hazard: The product is not flammablebut burns.

Explosion hazard: Avoid generation of dust; fine dust dispersed in air in sufficient concentration, and in the presence of an ignition source is a potential dust explosion hazards.

5.3. Advice for firefighters
Firefighting instructions: Use water spray or fog for cooling exposed containers. Exercise caution when fighting any chemical fire.

Protective equipment for firefighters: Do not enter fire area without proper protective equipment, including respiratory protection.
SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

**General measures**: In case of generation of dust from processing: Spills of this product as dust, present a serious slipping hazard.

Dust Deposits should not be allowed to accumulate on surfaces, as these may form an explosive mixture if they are released into the atmosphere in sufficient concentration.

6.1.1. For non-emergency personnel

**Emergency procedures**: Evacuate unnecessary personnel.

6.1.2. For emergency responders

**Protective equipment**: Equip cleanup crew with proper protection. Use appropriate PERSONAL PROTECTIVE EQUIPMENT and recover undamaged and minimally contaminated material for reuse and reclamation.

**Emergency procedures**: In case of generation of dust from processing: Ventilate area.

6.2. Environmental precautions

**Methods and material for containment and cleaning up**

**Methods for cleaning up**: In case of generation of dust or vapor from processing: Review HANDLING Section before proceeding with clean up. Use appropriate tools to put spilled solids in a convenient waste disposal container. Review FIRE FIGHTING MEASURES and HANDLING Sections before proceeding with clean up.

Avoid contact with skin and eyes. Avoid breathing dust and vapours. On land, sweep or shovel into suitable containers. Minimize generation of dust. Avoid raising airborne dust. Avoid dispersal of dust in the air (i.e., cleaning dust surfaces with compressed air). Non-sparking tools should be used.

6.3. Methods and material for containment and cleaning up

**Methods for cleaning up**: In case of generation of dust or vapor from processing: Review HANDLING Section before proceeding with clean up. Use appropriate tools to put spilled solids in a convenient waste disposal container. Review FIRE FIGHTING MEASURES and HANDLING Sections before proceeding with clean up.

Avoid contact with skin and eyes. Avoid breathing dust and vapors. On land, sweep or shovel into suitable containers. Minimize generation of dust. Avoid raising airborne dust. Avoid dispersal of dust in the air (i.e., cleaning dust surfaces with compressed air). Non-sparking tools should be used.

6.4. Reference to other sections

See Heading 8. Exposure controls and personal protection.

SECTION 7: Handling and storage

7.1. Precautions for safe handling

**Additional hazards when processed**: In case of generation of dust from processing: This product presents a serious slipping hazard.

**Precautions for safe handling**: Loading/ Unloading: Sheets should be unloaded with a forklift or other lifting device capable of handling pallets safely. If a lifting device is not available, always carry a single sheet in the vertical position and wear proper safety shoes and protective gloves as sheets may have sharp edges. Carrying should be done by two people facing each other on short sides with one hand under the bottom edge for support and the other hand on the top edge to control the sheet.

Processing/ Machining: Avoid breathing dust. Avoid breathing fumes generated during heating. Temperatures reached while thermoforming could be high enough to release some methyl methacrylate. Machining operations during fabrication, such as sawing, sanding or routing, create friction and may result in temperatures high enough to release small amounts of methyl methacrylate at the cutting tool surface. Ensure good ventilation of the work station. Wear personal protective equipment. Avoid raising airborne dust. Avoid contact with skin and eyes.

Routine housekeeping should be instituted to ensure that dusts do not accumulate on surfaces. Dry powders can build statics electricity charges when subjected to the friction of transfer and mixture operations. Provide adequate precautions, such as electrical grounding and bonding or inert atmospheres.

**Hygiene measures**: Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reuse.

7.2. Conditions for safe storage, including any incompatibilities

**Storage conditions**: No specific storage is required. Be sure that it is not necessary to strain to reach materials and that shelves are not overloaded.

**Incompatible materials**: No additional information available.

7.3. Specific end use(s)

**No additional information available**
SECTION 8: Exposure controls/personal protection

8.1. Control parameters

8.2. Exposure controls

Appropriate engineering controls: Use adequate ventilation to keep employee exposures to airborne concentrations below recommended limits for dust or vapors from operations such as machining, cutting, routing, sanding, etc. In addition, provide for appropriate exhaust ventilation and dust collection at machinery. In case of generation of dust or vapour from processing: It is recommended that all dust control equipment such as local exhaust ventilation and material transport systems involved in handling of this product contain explosion relief vents or an explosion suppression system or an oxygen deficient environment. Ensure that dust-handling systems (such as exhaust ducts, dust collectors, vessels, and processing equipment) are designed in a manner to prevent the escape of dust into the work area. Use only appropriately classified electrical equipment and powered industrial trucks.

Skin and body protection: Wear leather or cotton gloves when handling pieces to protect against cuts and abrasions. Safety shoes are also recommended whenever handling large pieces of material. Hearing protection may also be required during machining operations, depending on noise (decibel) levels.

Eye protection: Wear safety glasses during operations such as sawing, sanding, drilling, or routing. Also, machining operations could require safety goggles and face-shield to protect against flying debris/particles.

Respiratory protection: In case of insufficient or inadequate ventilation during machining operations or if airborne particulate concentrations or vapors are expected to exceed permissible exposure limits, use a NIOSH approved air-purifying respirator. Respirators should be selected based on the form and concentration of the air contaminant and in accordance with OSHA Respiratory Protection Standard(s).

SECTION 9: Physical and chemical properties

The workplace exposure limits are not applicable to products as is supplied. The provided workplace limits shall considered during processing resulting to generation of dust and/or vapors.
LG HI-MACS® Sheets
Safety Data Sheet
according to the federal final rule of hazard communication revised on 2012 (HazCom 2012)

Melting point : No data available
Freezing point : No data available
Boiling point : Not applicable
Flash point : Not applicable
Auto-ignition temperature : Not applicable
Decomposition temperature : No data available
Flammability (solid, gas) : No data available
Vapor pressure : Not applicable
Relative vapour density at 20 °C : No data available
Relative density : 1.7 – 1.8 (Water=1)
Solubility : Not soluble in water
Log Pow : No data available
Log Kow : No data available
Viscosity, kinematic : No data available
Viscosity, dynamic : No data available
Explosive properties : No data available
Oxidising properties : No data available
Explosive limits : No data available

9.2. Other information
No additional information available

SECTION 10: Stability and reactivity

10.1. Reactivity
No additional information available

10.2. Chemical stability
Stable at normal temperatures and storage conditions.

10.3. Possibility of hazardous reactions
Polymerization will not occur in solid state.

10.4. Conditions to avoid
Direct sunlight. Extremely high or low temperatures.

10.5. Incompatible materials
None reasonably foreseeable, non-corrosive.

10.6. Hazardous decomposition products
Frictional heat from machining that could reach or exceed a temperature of 300°C (572°F) could result in the release of a small amount of methyl methacrylate vapor.
Thermal Decomposition products: carbon monoxide, methyl methacrylate, and smoke.

SECTION 11: Toxicological information

11.1. Information on toxicological effects

Acute toxicity : Not classified

<table>

Skin corrosion/irritation : Not classified
Serious eye damage/irritation : Not classified
Respiratory or skin sensitisation : May cause an allergic skin reaction.
Germ cell mutagenicity : Not classified
Carcinogenicity : Not classified
Methyl methacrylate (80-62-6)

IARC group            3 - Not classifiable
Reproductive toxicity : Not classified
Specific target organ toxicity (single exposure) : Not classified
Specific target organ toxicity (repeated exposure) : Not classified
Aspiration hazard : Not classified
Potential Adverse human health effects and symptoms : Based on available data, the classification criteria are not met.

SECTION 12: Ecological information

12.1. Toxicity
Ecology - general : The product is not considered harmful to aquatic organisms or to cause long-term adverse effects in the environment.

<table>
